Manufactured in Italy, Vertex, the premier brand of OEM replacement pistons, is the OEM supplier to KTM and numerous European motorcycle and go-kart manufacturers. Vertex offers enthusiasts state-of-the-art, high-quality pistons for nearly any powersport use from motorcycles and ATVs to marine and karting. Manufactured to the highest standards in Japan, Vertex's piston rings are produced by the OEM suppliers so that they are direct OEM replacements. Vertex is the choice of those who truly seek the optimum in powersport performance in any application.

I pistoni Vertex sono interamente prodotti in Italia e sono primo equipaggiamento di numerose case europee produttrici di moto e go-kart, con in evidenza KTM. Vertex offre agli esperti di elaborazioni, pistoni di alta qualità tecnologicamente ai vertici del settore, utilizzabili per qualsiasi applicazione nei settori: moto (strada e fuoristrada), Quad, ATV, go-kart e fuoribordo, dove il massimo della potenza è un requisito imprescindibile. I segmenti assemblati da Vertex sui propri pistoni, sono fabbricati in Giappone secondo i massimi standard del settore dai fornitori OEM delle maggiori case giapponesi di moto, sono quindi intercambiabili con i prodotti originali. Vertex è la scelta numero uno di chi esige il massimo delle prestazioni nel mondo degli sport motoristici, per qualsiasi applicazione.

Cast vs. Forged
What's better and why:

Vertex Two-stroke Pistons

Because of a cast piston's ability to contain higher silicon content compared to forged pistons, and because two-strokes have lower cylinder pressures when compared to four-strokes, cast pistons are ideal for two-stroke engines. Vertex pistons are gravity cast from an aluminum alloy with 18% silicon content. Silicon is important because:

- *It decreases thermal expansion, which changes the geometry after the piston reaches operating temperature. With low thermal expansion characteristics, Vertex pistons can be run at tighter tolerances compared with forged pistons. This creates better power and performance, also making them less susceptible to rattling or breaking.*
- *Silicon gives the pistons better wear characteristics and prolongs piston life by decreasing wear on the piston skirt.*

Fuso o forgiato
Cosa è meglio e perché:

Pistoni Vertex per motori a 2 tempi

Poiché un pistone realizzato tramite fusione può avere un contenuto maggiore di silicio rispetto al forgiato, e poiché nei motori a 2 tempi le pressioni nei cilindri sono inferiori rispetto alle versioni a 4 tempi, i pistoni fusi sono la soluzione ideale per questa applicazione. I pistoni Vertex 2 tempi, sono realizzati per fusione a gravità da una lega di alluminio con contenuto di silicio pari al 18%. Il contenuto di silicio è importante perché:

- Riduce l'espansione termica che determina il cambiamento della geometria del profilo dopo che il pistone raggiunge la temperatura d'esercizio. Grazie a caratteristiche di espansione termica ridotta, i pistoni Vertex per motori 2 tempi, possono funzionare con tolleranze più ristrette rispetto ai pistoni forgiati. Ciò garantisce un sensibile incremento in termini di potenza e durata, con la sicurezza di un funzionamento più silenzioso e senza eventuali rotture.
- La presenza dell'alto contenuto di silicio permette anche una migliore resistenza all'usura e prolunga quindi la vita del pistone senza cali di prestazioni.

Vertex Four-stroke Pistons

Four-stroke engines have much higher cylinder pressures when compared to two-strokes and are generally manufactured from forgings. To handle the internal pressures of a four-stroke engine, Vertex's four-stroke pistons are forged from the highest quality 2618 aluminum alloy for superior strength and durability. Vertex uses unique piston profiles and compression ratios, offered in A, B, C and D sizes, to maximize power and performance while reducing blow-by and oil consumption.

Pistoni Vertex per motori a 4 tempi

I motori a 4 tempi hanno pressioni nei cilindri molto più elevate rispetto ai 2 tempi e generalmente i pistoni da equipaggiarli, vengono prodotti tramite forgiatura a caldo. I pistoni Vertex per motori 4 tempi vengono forgiati a caldo dalla lega per uso aeronautico 2618, un prodotto di altissima qualità che garantisce doti superiori di resistenza e durata. Vertex applica poi profili esclusivi e conformazioni di testa derivati dallo sviluppo fatto con i teams, il tutto al fine di ottimizzare al massimo potenza, coppia e prestazioni in generale, riducendo al contempo consumo d'olio e trafilamento (blow by).

Aiding in the break-in process and reducing wear, every Vertex piston has a Molybdenum Disulphide (MOS2) coating on the piston skirt.

Per facilitare il rodaggio e ridurre l'usura, ogni pistone Vertex è provvisto di rivestimento in bisolfuro di molibdeno (MOS2) sull'intero corpo del pistone.

Vertex Wrist Pin Features:

- *KTM four-stroke wrist pins are DLC coated.*
- *Case hardened wrist pins are used with all Vertex pistons.*
- *Nitride coated pins are normally used for high performance four-stroke engines utilizing a bronze bushing or with engines using a steel connecting rod without bearings. This hardened surface is highly wear resistant and provides anti-galling properties.*
- *Nitriding is a highly specialized surface treatment that produces a highly wear resistant surface. The significant advantage of nitriding is that the surface hardness is developed without quenching and the attendant distortion problems with case hardening. Finishing operations can be eliminated or held to a minimum.*

Spinotti Vertex:

- Gli spinotti Vertex, sono normalmente prodotti in acciaio legato con trattamento di cementazione. In aggiunta, esistono le seguenti varianti per i rispettivi campi di applicazione:
- Spinotti nitrurati che sono normalmente utilizzati per motori a quattro tempi a elevate prestazioni, che hanno la biella in acciaio con o senza bronzina. La superficie nitrurata è altamente resistente all'usura e fornisce caratteristiche antigrippaggio.
- Gli spinotti per i pistoni destinati a motori 4 tempi KTM, sono provvisti di rivestimento in DLC.

Vertex Piston Rings

Vertex's latest generation two-stroke and four-stroke piston rings are nitride coated or chrome plated, increasing wear resistance and extending durability. Vertex piston rings are exact OEM replacements.

Segmenti Vertex

I segmenti Vertex di ultimissima generazione per motori a 2 e 4 tempi sono realizzati in acciaio con trattamenti di nitrurazione o cromatura. Il tutto per aumentare la resistenza all'usura e per migliorare la durata di vita. I segmenti per pistoni Vertex sono intercambiabili con i corrispettivi prodotti OEM.

All Vertex Pistons Feature:

- *Standard pistons and components are OEM replacements.*
- *Kits include piston, rings, wrist pin and circlips.*
- *All pistons are heat treated with a T-5 or T-6 hardening and tempering cycle.*
- *Replacement rings are sold individually.*

All Vertex Pistons Feature:

- I pistoni e i componenti standard sono intercambiabili con i rispettivi prodotti OEM.
- I kit comprendono pistone, segmenti, spinotto e anellini.
- Tutti i pistoni sono sottoposti a trattamento termico con ciclo di bonifica T5 o T6.
- I segmenti di ricambio vengono anche venduti singolarmente.

GP Racers Choice
GP Racers Choice

*The **GP Racers Choice** has forged treatment and stands out for the T-Bridge exclusive machined, inspired by F1. His racing profile and the special shape of the head allows the maximum compression ratio with a great performance implementation without any loss of reliability. The piston is completed with nitride ring set, DLC coated pin, moly coated.*

La **GP Racers Choice**, forgiato ad alta resistenza, spicca per l'esclusiva lavorazione con traversino, una tecnologia derivata dalla Formula 1, che assieme al profilo racing e alla particolare conformazione della testa permette di ottenere il massimo rapporto di compressione a tutto vantaggio delle performance senza sacrifici per l'affidabilità. Il pistone è completato da segmenti nitrurati, spinotto con rivestimento DLC e ricopertura in bisolfuro di molibdeno.

After disassembling the cylinder head and the cylinder, it's necessary to measure the actual cylinder diameter **(1)**, using a dial bore gauge. When actual bore size is known then it is time to pick the right VERTEX piston to fit your bore size, respecting the clearance suggested with the cylinder (i.e. CR 125 clearance 0.05 mm).

Open the piston box, take the ring and position it inside the cylinder bore. Measure the gap **(2)** between the two ring ends: it must be between a minimum of 0.25 and a maximum of 0.50 mm; if necessary adjust the ring end gap dimension using a file **(3)**. Take special care when performing this step.

We are now ready to assemble the ring into the piston groove: first of all pay attention to not crush or damage the ring during installation, every precaution should be taken not to compromise the ring integrity with the groove and to not reduce the rings retaining pressure.

Attention must be paid to any markings (i.e. T) on the rings surface: always position the ring with the written part on the top side.

Introduce before the ring from the side opposite to the locating pin and turning it as it was a spring taking care to not damage the groove during the operation. After verifying that the rings do not have strange creeping or binding, position the ring tips around the locating pin.

We are now ready to assemble the piston and cylinder. A light coating of two stroke oil should be applied to the piston with the ring(s) assembled. Position the arrow printed on the piston dome toward the exhaust side, install one circlip on the opposite side you will slide the pin thru and pressing the ring (or the rings) into the groove one by one starting from the top slide the cylinder assembly over the rings. When this is complete carefully lower piston and cylinder onto the connecting rod and slide piston pin thru piston and rod and install circlip. If you prefer you may install piston onto connecting rod first and then compress ring(s) and install cylinder **(4)**.

Assemble cylinder onto cases and install cylinder head and torque all fasteners to the recommended specs in your owner's manual.

Attention must be paid to any markings (i.e. T) on the rings surface: always position the ring with the written part on the top side.

To assemble the rings on the piston you must start from the oil ring and introducing as first the spring **(2)** paying attention to not place one on the top of the other the two extremities. After setting the two foils one up and the other down at direct contact with the groove, taking care that the open tips must be at 120° from the spring open tips.

We are now ready to assemble the compression ring(s) into the piston groove(s): first of all pay attention to not crush or damage the ring during installation, every precaution should be taken not to compromise the ring integrity with the groove and to not reduce the rings retaining pressure.

Introduce before the 2nd groove and after the 1st groove ring turning it as it was a spring **(3)** taking care to not damage the groove during the operation. After verifying that the rings do not have strange creeping or binding, position all the rings using the rule of the 120 deg. for each ring tip.

We are now ready to assemble the piston and cylinder. A light coating of two stroke oil should be applied to the piston with the rings assembled. Hot Rods, the "Original Cranks and Rods," has been making the best aftermarket crankshafts and connecting rods for over a decade. Customers have come to recognize that there is no substitute for the quality of Hot Rods products. Moreover, all Hot Rods cranks and rods can be had for considerably less money than OEM, but without any sacrifice to quality. And, for those dirt bike and ATV riders seeking added performance from their mount, Hot Rods offers a full line of stroker crankshafts. These cranks will not only provide the power that riders seek, but do so without additional machine work or spacer plates — and most utilize the stock piston.

Hot Rods, the "Original Cranks and Rods," da oltre dieci anni realizza i migliori alberi motore e le migliori bielle per il mercato aftermarket. I clienti hanno riconosciuto che la qualità dei prodotti Hot Rods non ha eguali sul mercato. Inoltre, tutti gli alberi motore e tutte le bielle Hot Rods sono disponibili a un prezzo infinitamente inferiore rispetto ai ricambi OEM, senza alcun compromesso a livello di qualità. E per i piloti che alla guida di moto da cross, Quad ed ATV, ricercano nuove soluzioni per incrementare le prestazioni dei loro mezzi, Hot Rods offre una gamma completa di alberi motore stroker. Tali alberi motore oltre a fornire l'incremento di potenza richiesto dai piloti, non richiedono applicazioni extra o l'impiego di piastre distanziali e consentono nella maggior parte dei casi l'impiego di pistoni standard.

Hot Rods Connecting Rods

One single connecting rod is where it all began for Hot Rods and, now, with over a decade of experience, continously improved designs and an ever expanding line of applications; Hot Rods has continued to be, not only "The Original" aftermarket replacement rod, but the best aftermarket replacement rod.

All of our rods are created from 8620 case hardened steel. But, in addition to that, our rods also undergo a process of double forging which helps to improve grain flow as well as dimensional consistency — and that means a rod of uncompromising strength.

To improve fatigue durability, all of our rods are also shot peened. This process, utilizing a stainless steel shot, helps to remove stress risers and creates more smoothly blended radiuses. And, in the end, a Hot Rods connecting rod is one of the most durable rods that enthusiasts and engine builders can buy.

However, a rod is only as good as its supporting parts and that's why a Hot Rods kit features only the most advanced and durable bearings, crank pins and thrust washers. Case hardened, silver coated, flat profile KU bearings are used throughout our entire line and high-quality, long shouldered KZ bearings are used in our two-stroke wrist pin bearing applications. In short, our bearings are just as tough and reliable as our rods.

Even our crank pins are subjected to the same rigorous standards as our rods and bearings. Each Hot Rods crank pin is created from hot-rolled ASTM 4115 steel and case-hardened to a level of 58–62 Rc.

Bielle Hot Rods

La storia di Hot Rods ha avuto inizio da una sola biella, e ora, con oltre dieci anni di esperienza alle spalle, continua con miglioramenti a livello di design e progettazione e con una gamma di applicazioni in continua espansione. Hot Rods oltre a essere diventato per eccellenza il marchio di bielle di ricambio "Originali" per il mercato aftermarket, è anche ritenuto a ragione il marchio numero uno per qualità.

Tutte le nostre bielle sono create a partire da acciaio cementato 8620. Le nostre bielle inoltre sono sottoposte a un processo di doppia forgiatura che aiuta a migliorare il fibraggio (grain flow) nonché l'uniformità dimensionale, ottenendo una biella dalla resistenza senza compromessi.

Per migliorare la resistenza alla fatica, tutte le nostre bielle vengono anche sottoposte a pallinatura controllata. Tale processo, che utilizza pallini in acciaio inossidabile, aiuta ad eliminare i punti deboli in cui si concentra il carico, creando raggi con mescola più uniforme. Una biella Hot Rods è praticamente una delle bielle più resistenti che gli appassionati di elaborazioni e i costruttori di motori possano acquistare sul mercato.

Ovviamente però una buona biella è tale solo se i suoi componenti di sostegno sono altrettanto buoni, per questo il kit di Hot Rods comprende solo cuscinetti, perni e rondelle di spinta di altissima qualità, tecnologicamente avanzati e altamente resistenti. I cuscinetti KU a profilo piatto, cementati, rivestiti in argento, sono utilizzati in tutta la nostra gamma di prodotti, mentre i cuscinetti KZ di alta qualità, con spalla lunga, sono utilizzati per applicazioni con cuscinetti per spinotto nei motori a due tempi. Tutto questo garantisce che i nostri cuscinetti siano resistenti e affidabili quanto le nostre bielle.

Persino i nostri perni sono sottoposti agli stessi rigorosi standard delle nostre bielle e dei nostri cuscinetti. Ciascun perno di Hot Rods viene creato a partire da acciaio laminato a caldo ASTM 4115 e cementato a un livello di 58–62 Rc.

Additional Hot Rods connecting rod features:

- *Double-honed bearing surfaces to provide a reliable, high RPM rod*
- *Double-drilled small ends for increased lubrication*
- *Bronze bushings in the small end of all four-stroke rods to maximize durability under high-loads.*
- *Specially designed vent slots in the large end of all two-stroke rods for improved lubrication*
- *Side scalloping on large end to minimize high RPM rod distortion*

Ulteriori caratteristiche delle bielle Hot Rods:

- Superfici del cuscinetto a doppia levigatura per bielle per elevati giri-minuto ed elevata affidabilità
- Piedi di biella con doppia foratura per migliorare la lubrificazione
- Boccole in bronzo nel piede di biella di tutte le bielle per motori a 4 tempi, per il massimo della resistenza sotto carichi elevati.
- Fenditure di sfiato appositamente progettate nell'estremità più ampia di tutte le bielle per motori a due tempi, per una migliore lubrificazione
- Frastagliatura laterale sull'estremità più ampia, per ridurre al minimo la distorsione della biella per elevati giri al minuto

Hot Rods Crankshafts

Building on the success of high-quality, OEM replacement rods, Hot Rods introduced the perfect place to showcase them — in a Hot Rods OEM replacement crankshaft. Since that time, Hot Rods crankshafts have been regarded as the premier alternative to costly manufacturer cranks. But, in addition to being a cost effective alternative, Hot Rods crankshafts also bring a level of uncompromising quality, design and innovation not seen in its competitors.

One such innovation would be the Hot Rods line of drop-in stroker crankshafts. Not only do these stroker cranks bring about a heightened level of performance, but do so without costly case machining, custom cam chains and spacer plates. Better yet, many Hot Rods stroker cranks even utilize the engine's stock piston.

Alberi motore Hot Rods

Sulla scia del successo delle bielle di ricambio OEM di alta qualità, Hot Rods ha introdotto l'alloggiamento perfetto per ospitarle: un albero motore di ricambio OEM Hot Rods. Da quel momento gli alberi motore Hot Rods sono considerati l'alternativa numero uno ai costosi alberi motore delle case costruttrici. Ma oltre a essere un'alternativa conveniente, gli alberi motore Hot Rods forniscono anche un livello di qualità senza compromessi e un livello di design e innovazione, ineguagliabile dalla concorrenza.

Tra le innovazioni di punta vi è la gamma Hot Rods di alberi motore stroker drop-in. Questi alberi motore stroker oltre a garantire un livello elevato di prestazioni, non comportano extra lavorazioni e non richiedono catene per camme o piastre per distanziali su misura. Un ulteriore vantaggio consiste nel fatto che molti alberi stroker Hot Rods utilizzano persino il pistone standard del motore.

Additional Hot Rods crankshaft features:

- *All crankshafts are sold complete and ready for installation with the original proven Hot Rods Connecting Rods, top end bearings, and crankshaft webs*
- *Factory assembled and trued to OEM specifications, Hot Rods Cranks will meet or surpass the OEM in performance and durability*
- *Crankshafts are fully rebuildable with genuine Hot Rods connecting rods and bearings*
- *Multi-cylinder applications are sold complete with main bearings (unless specified otherwise).*
- *Two and four-stroke applications available*

Caratteristiche aggiuntive degli alberi motore Hot Rods:

- Tutti gli alberi motore sono venduti completi e pronti per l'installazione con bielle, gabbia spinotto ed accessori per albero motore originali collaudate Hot Rods.
- Assemblati in azienda e centrati secondo le specifiche OEM, gli alberi motore Hot Rods sono di livello uguale o superiore ai componenti OEM in termini di performance e durata.
- Gli alberi motore sono completamente ricostruibili con bielle e cuscinetti originali Hot Rods
- Le applicazioni multi-cilindro includono i cuscinetti principali (salvo diversamente specificato).
- Applicazioni per 2 e 4 tempi tutte disponibili

Hot Rods Main Bearings and Seals

To compliment Hot Rods full line of OEM replacement and stroker crankshafts are Hot Rods complete main bearing and seal kits. Like other Hot Rods products, these main bearing and seal kits are built to the highest quality standards that meet or exceed those of OEM.

Additionally, not only will Hot Rods main bearing and seal kits work in rebuilding a Hot Rods crankshaft; but, they also work in rebuilding OEM cranks as well.

Cuscinetti e guarnizioni principali Hot Rods

Completano la gamma di alberi motore per ricambi OEM e stroker i nostri kit completi di cuscinetti e guarnizioni principali Hot Rods. Come altri prodotti Hot Rods, questi kit di cuscinetti e guarnizioni principali sono realizzati in conformità ai massimi standard di qualità che superano o eguagliano gli standard dei componenti OEM.

Inoltre i kit di cuscinetti e guarnizioni principali Hot Rods, oltre alla ricostruzione di alberi motore Hot Rods, sono perfetti per la ricostruzione degli alberi motore OEM.

New Hot Rods Waterpump Repair Kit

Furthering our ability of supplying everything needed for complete engine rebuilds is an entire line of water pump rebuild kits for dirt bike and ATV applications. These kits include everything needed to restore a blown water pump seal or worn out shaft bearing.

Nuovo Kit Revisione Pompa

Coerenti con la nostra capacità di poter fornire qualsiasi parte per ricostruire un motore, proponiamo una nuova E completa linea di Kit revisione pompa acqua per moto da fuori strada e ATV. Questi Kit includono tutto il necessario per riparare la pompa dell'acqua danneggiata, i paraoli o i cuscinetti usurati.

As the leader in innovation, design and development of aftermarket dirt bike and ATV high-performance camshafts, a set of Hot Cams is certain to give the added boost that dirt bike and ATV enthusists are looking for. CNC crafted from billet steel and with multiple stages to choose from for many applications, Hot Cams delivers the performance and feel of a custom cam for a fraction of the price. Ease of intallation is also a big benefit when it comes to Hot Cams, as nearly all cams require no additional machine work and utilize the stock valve springs. And, as has always been the policy at Hot Cams, you can keep your original cams since a core exchange is never required.

Hot Cams è il marchio leader per alberi a camme ad elevate prestazioni per moto da cross, Quad ed ATV e costituisce la miglior scelta per ottenere quel miglioramento delle prestazioni che tutti gli appassionati di elaborazioni di moto da cross, Quad ed ATV ricercano. Gli alberi a camme Hot Cams, realizzati da billette di acciaio e lavorati con macchine CNC dell'ultima generazione, sono proposti per svariate applicazioni e con un'ampia scelta di soluzioni, garantendo prestazioni ed emozioni di un albero a camme realizzato su misura, ma ad un prezzo infinitamente più accessibile. La facilità di installazione è un altro enorme vantaggio dei prodotti Hot Cams, poiché quasi tutti gli alberi a camme non necessitano di alcuna lavorazione extra ed utilizzano le molle per valvole standard. Inoltre, nel rispetto della filosofia Hot Cams, potete conservare le camme originali, perché non è mai necessario sostituire l'anima.

Hot Cams Performance Camshafts

Designed, dyno proven and made in the USA, Hot Cams performance camshafts are one of the most economical, reliable and easy to install ways to add a 5-10% power gain to dirt bikes or ATVs. Additionally, every Hot Cams cam is:

- *CNC machined for an exact fit and lobe profile.*
- *Created from 8620, billet, case-hardened steel.*
- *Engineered by utilizing state-of-the-art valvetrain software.*
- *Engineered to be drop-in cams that use stock valve springs.*

Alberi a camme ad elevate prestazioni Hot Cams

Gli alberi a camme ad elevate prestazioni Hot Cams, progettati, sottoposti a dynotest e realizzati negli USA, sono il metodo più conveniente, più sicuro e più semplice per aggiungere dal 5 al 10% di potenza su moto da cross, Quad ed ATV. Inoltre, tutti gli alberi a camme Hot Cams hanno le seguenti caratteristiche:

- Sono realizzati con macchine CNC, la migliore garanzia di adeguatezza dimensionale ed esattezza del profilo del lobo.
- Sono creati a partire da billette di acciaio cementato 8620.
- Sono progettati con software per la gestione della punteria allo stato dell'arte.
- Sono progettati per inserimento diretto in camme che utilizzano molle per valvole standard.

Hot Cams Shim Kits and Refill Packs

For value and convenience, Hot Cams shim kits are the perfect addition to any tool box, garage or shop. With complete kits for modern Japanese 250 and 450Fs, as well as the new 8.90mm shim for KTM bikes, these shims make valvetrain maintenance a snap.

Plus, for those with existing shim kits that might be running low, Hot Cams also offers shim refill packages to keep the kit complete and always at the ready.

Kit di piattelli per valvole e confezioni di ricambi Hot Cams

Per qualità e convenienza, i kit di piattelli per valvole Hot Cams sono l'accessorio perfetto per qualsiasi preparatore, team od officina. Con kit completi per le moderne 250 e 450F delle case giapponesi e con il nuovo piattello da 8,90mm per le moto KTM, la manutenzione della punteria viene resa semplice e veloce.

Inoltre, per ricomporre le scorte nei kit di piattelli che si stanno esaurendo, Hot Cams offre confezioni di ricambi per completare il kit ed essere sempre pronti a ogni evenienza.

Hot Cams Builder Series Cams and Gold Series Cams and Springs

The newest additions to the already impressive array of Hot Cams performance camshafts are the Builder Series Cams. The Builder Series Cams, like the standard line of cams, are rooted around ease of installation and genuine, usable performance increases. However, these cams take it a few steps further.

The Builder Series and Gold Series cams are aimed at enthusiasts and engine builders that are looking for the optimum in performance, flexibility and reliability. More importantly, Gold Series cams are designed to compliment modified engines using such things as big bore cylinders, high compression pistons and performance exhausts. Additionally, many applications will see a wide variety of cams to transform and tune your engine to your specific needs. Whether it's endurocross or flat track racing, there's a Gold Series or Builder Series cam to hone the powerband just as it's needed.

Unlike the standard Hot Cams, the Gold Series cams utilize the new line of Gold Series springs. These springs, crafted from premium quality Japanese spring steel, allow for greater flexibility in the cam design and ensure that the valvetrain will remain at its peak performance and trouble-free.

Simply stated, Hot Cams Builder Series and Gold Series cams are modified cams that are specifically tailored to unleash the power within modified engines.

Alberi a camme e molle Hot Cams Gold Series

Gli alberi a camme e i kit di molle Hot Cams Gold Series per elevate prestazioni sono l'ultimo ritrovato di una gamma già impressionante di alberi a camme Hot Cams. Gli alberi a camme della serie Gold Series, come quelli della linea standard, si distinguono per facilità di installazione e per il miglioramento concreto e visibile delle prestazioni.

Ma i vantaggi non si limitano a questo.

I nuovi alberi a camme Gold Series sono la scelta numero uno degli appassionati di elaborazioni e dei costruttori di motori alla ricerca del non plus ultra a livello di prestazioni, flessibilità e affidabilità. Gli alberi a camme della serie Gold Series sono inoltre progettati per la personalizzazione di motori modificati, utilizzando cilindri con diametro maggiorato, pistoni ad elevata compressione e marmitte ad elevate prestazioni. L'ampia scelta di alberi a camme consente di soddisfare qualsiasi esigenza e applicazione, offrendo soluzioni infinite per trasformare ed elaborare il proprio motore. Per qualsiasi tipo di pista, da enduro o cross, o per qualsiasi tracciato c'è sempre un albero a camme Gold Series in grado di fornire la potenza necessaria.

A differenza degli alberi a camme standard Hot Cams, quelli della serie Gold Series utilizzano la nuova gamma di molle Gold Series. Queste molle, realizzate a partire da acciaio per molle giapponese di qualità eccezionale, consentono una maggiore flessibilità a livello di progettazione dell'albero a camme e garantiscono il mantenimento delle massime prestazioni della punteria, senza inconvenienti. Gli alberi a camme Hot Cams Gold Series sono semplicemente alberi a camme modificati studiati su misura per scatenare la potenza dentro ai motori elaborati.

Online Installation Videos and Dyno Charts

Need a little brushing up on how to install cams or just curious what all is involved in doing so? From removing that first bolt to breaking in newly installed cams, Hot Cams has free, detailed, step by step videos available online at hotcamsinc.com.

Also online, is an extensive library of Hot Cams dyno charts so you can see exactly where the power gains are coming from and what Hot Cam is best for you.

Video per l'installazione e schemi dinamometrici disponibili online

Avete bisogno di un piccolo ripasso su come si installano gli alberi a camme o volete semplicemente saperne di più? Sul sito www.hotcamsinc.com di Hot Cams sono disponibili online video gratuiti con descrizioni dettagliate che vi accompagnano passo per passo dallo smontaggio del primo bullone fino al rodaggio di alberi a camme appena installati.

Inoltre è disponibile online un'ampia rassegna di schemi dinamometrici Hot Cams, con cui potrete vedere chiaramente da dove viene il miglioramento di potenza e con cui potrete scoprire quale soluzione Hot Cam è la migliore per le proprie esigenze.

Uses stock valve springs, rockers, and auto decompression mechanism.* Motore Single cam. Consistente aumento della coppia sotto i 9000RPM rispetto all'originale. Utilizza molle valvole e decompressore originali.	**278,05**
CRF 450R	2009	**1124-2**	*Stage 2 cam: single cam motor. Same low end power as OEM cam up to 6,000 RPM and improved power from 6,000 to rev limit. Uses stock valve springs, rockers, and auto decompression mechanism.* Motore Single cam. Curva di coppia e potenza invariata fino a 6000RPM, consistenti miglioramenti oltre i 6000RPM. Utilizza molle valvole decompressore originali.	**278,05**
CRF 450R	2009	**1125-3**	*Stage 3 cam: single cam motor. Best suited for engines requiring more breathing capability. Uses stock valve springs, rockers, and auto decompression mechanism.* Motore Single cam. Ottima resa per motori che necessitano di maggior aspirazione di aria come i maggiorati. Utilizza molle valvole e decompressore originali.	**278,05**
CRF 450R	2010-2012	**1176-BLD***	*Builder Series: Single cam engine. Good bottom end cam for modified engines. Can be used with stock or aftermarket valve springs, if ignition rev limit is increased requires spings VSK1009. Uses stock auto decompression mechanism.* Motore Single cam. Ottima resa ai bassi regimi sumotori elaborati. Può essere utilizzata con molle valvole originali o rinforzate. Si consiglia l'utilizzo delle molle VSK1009 con motori elaborati. Utilizza il decompressore originale.	**304,83**
CRF 450R	2010-2012	**1177-BLD***	*Builder Series: Single cam engine. Good midrange cam for modified engines. Can be used with stock or aftermarket valve springs, if ignition rev limit is increased requires spings VSK1009. Uses stock auto decompression mechanism.* Motore Single cam. Ottima resa ai medi regimi su motori elaborati. Può essere utilizzata con molle valvole originali o rinforzate. Si consiglia l'utilizzo delle molle VSK1009 con motori elaborati.Utilizza il decompressore originale.	**304,83**
CRF 450R	2010-2012	**1178-BLD***	*Builder Series: Single cam engine. Good high RPM cam for modified engines needing high RPM capability. Can be used with stock or aftermarket valve springs, if ignition rev limit is increased requires spings VSK1009. Uses stock auto decompression mechanism.* Motore Single cam. Ottima resa agli alti regimi su motori elaborati. Può essere utilizzata con molle valvole originali o rinforzate. Si consiglia l'utilizzo delle molle VSK1009 con motori elaborati. Utilizza il decompressore originale.	**304,83**
CRF 450R	2010-2012	**1179-BLD***	*Builder Series: Single cam engine. Good midrange cam for modified engines that are oversized. Can be used with stock or aftermarket valve springs, if ignition rev limit is increased requires spings VSK1009. Uses stock auto decompression.* Motore Single cam. Ottima resa ai medi regimi su cilindri maggiorati. Può essere utilizzata con molle valvole originali o rinforzate. Si consiglia l'utilizzo delle molle VSK1009 con motori elaborati. Utilizza il decompressore originale.	**304,83**
CRF 450R	2010-2012	**1180-BLD***	*Builder Series: Single cam engine. Good top end cam for modified engines that are oversized. Can be used with stock or aftermarket valve springs, if ignition rev limit is increased use stiffer intake springs. Uses stock auto decompression mechanism.* Motore Single cam. Ottima resa agli alti regimi su cilindri maggiorati. Può essere utilizzata con molle valvole originali o rinforzate. Si consiglia l'utilizzo delle molle aspirazioni irrigidite con motori ad alti regimi di rotazione. Utilizza il decompressore originale.	**304,83**
CRF 450R	2010-2012	**1181-BLD***	*Builder Series: Single cam engine. Good low RPM cam for modified engines that are oversized. Can be used with stock or aftermarket valve springs, if ignition rev limit is increased use stiffer intake springs. Uses stock auto decompression mechanism.* Motore Single cam. Ottima resa ai bassi regimi su cilindri maggiorati. Può essere utilizzata con molle valvole originali o rinforzate. Si consiglia l'utilizzo delle molle aspirazioni irrigidite con motori ad alti regimi di rotazione. Utilizza il decompressore originale.	**304,83**

KX 450F	2006-2013	2189-INBLD*	*This cam is similar to the 2185-1IN and will more the torque curve a few hundred rpm lower overall.* Simile al codice 2185-IN. Migliora la curva di coppia alcune centinaia di giri al di sotto.	236,85
KX 450F	2006-2013	2190-INBLD*	*This cam is similar to the 2185-1IN and will more the torque curve a few hundred rpm higher overall.* Simile al codice 2185-IN. Migliora la curva di coppia alcune centinaia di giri al di sopra.	236,85
KX 450F	2006-2013	2191-INBLD*	*This cam will provide increased intake capacity and higher rpm capability over the 2187-2IN cam.* Miglioramento nell'aspirazione rispetto al codice 2187-2IN.	236,85
KX 450F	2006-2013	2192-INBLD*	*This cam provides the maximum lift possible without valve springs or guide modification. Best suited for modified engines with good port flow and high rpm capability.* Permette la massima alzata possibile senza modificare le molle valvole o le guide. Si consiglia per motori elaborati ad alte prestazioni.	236,85
KX 450F	2006-2013	2193-EXBLD*	*This cam is similar to the 2186-1E, but will provide a more torque curve with somewhat more mid-range.* Simile al codice 2186-E con un sostanziale miglioramento della coppia ai medi giri.	236,85
KX 450F	2006-2013	2194-EXBLD*	*Similar to 2186-1E, but will better suit engines with modifications.* Simile al codice 2186-1E. Ideale in combinazione con motori elaborati ad alte prestaazioni.	236,85
KX 450F	2006-2013	2195-EXBLD*	*Similar to 2188-2E, but will provide better mid-range torque.* Simile al codice 2188-2E con un sostanziale miglioramento della coppia ai medi giri.	236,85
KX 450F	2006-2013	2216-EXBLD*	*Similar to the 2195-EXBLD, better suited to modified engines with good intake and exhaust flow ability. This cam may provide better peak torque and increased high rpm capability.* Simile al codice 2195-EXBLD. Ideale in combinazione con motori elaborati ad alte prestazioni. Questo articolo produce un picco di coppia e migliora le prestazioni agli alti regimi.	236,85
KX 450F	2006-2013	2217-EXBLD*	*This cam provides an intermediate choice between the #2195-EXBLD and the #2216-EXBLD. It provides very good low RPM torque, a broad torque curve and no loss in peak horsepower.* Questo articolo è una scelta intermedia tra il codice 2195-EXBLD e il 2216-EXBLD. Aumenta sensibilmente la coppia ai bassi regimi migliorando la curva di coppia senza perdere potenza agli alti.	236,85

CYLINDER WORKS
Standard • Big Bore

As an alternative to costly OEM cylinders or the time consuming process of re-plating existing cylinders, Cylinder Works offers enthusiasts access to a complete line of OEM quality dirt bike and ATV replacement cylinder kits. In addition to standard bore, stock compression replacement cylinder kits, Cylinder Works also turns up the horsepower with a full line of high-compression and big bore cylinder kits that look just like stock, but they're not. Each kit comes complete with the piston, rings and gaskets to get back on the trail or track quickly.

Come alternativa all'acquisto dei costosi cilindri OEM o al laborioso procedimento di riparazione dei cilindri originali, Cylinder Works offre agli esperti di elaborazioni l'accesso a una gamma completa di cilindri di ricambio di qualità OEM per moto da cross, Quad ed ATV. Oltre a cilindri di ricambio di diametro standard, Cylinder Works dà spazio alla potenza con una gamma completa di cilindri a diametro maggiorato, che permettono l'incremento della cilindrata e sembrano di serie, ma non lo sono. Le versioni con diametro maggiorato sono disponibili per l'acquisto come singolo cilindro o come kit completo, comprensivo di pistone, segmenti e guarnizioni, il tutto con un pronto servizio per tornare in pista il più velocemente possibile.

Cylinder Works OEM Replacement Cylinder Kits
(standard bore/stock compression)

Replating or repairing an OEM cylinder takes time. And replacing an OEM cylinder with another OEM cylinder takes money — plenty of it. But Cylinder Works has a better answer: Get new now, get Cylinder Works!

Gone is the wait associated with replating and repairing, and so is the price tag — all without sacrificing quality.

Each Cylinder Works replacement cylinder kit is:
- *Stock in appearance*
- *Precision honed*
- *Nickel silicon carbide plated*
- *OEM quality without the OEM price*
- *Pistons are hand matched for precision fitment*

Cilindri di ricambio OEM Cylinder Works
(standard bore/stock compression)

La rettifica o la riparazione di un cilindro OEM è un'operazione laboriosa. E sostituire un cilindro OEM con un altro cilindro OEM costa…e molto! Cylinder Works propone una soluzione migliore: acquistarne subito uno nuovo, di Cylinder Works!

Grazie a Cylinder Works i tempi lunghi delle rettifiche e delle riparazioni sono acqua passata, e i prezzi non sono più un problema. Il tutto a compromessi zero in termini di qualità.

Ogni cilindro di ricambio Cylinder Works è:
- Standard solo all'apparenza
- Levigato di precisione
- Rivestito in nichel carburo di silicio
- Dotato di tutta la qualità e le caratteristiche di un prodotto OEM, tranne il prezzo

Cylinder Works High-Compression Kits
(standard bore/high-compression)

As we all know, higher compression equals more horsepower and that's exactly what Cylinder Works high compression cylinder kits provide. Just like our OEM replacement cylinders, our high-compression cylinder kits look like stock, but they're not.

In addition to their stock appearance, Cylinder Works high-compression cylinder kits also feature precision honing, nickel silicon carbide plating and a price that's hard to beat.

Cilindri con diametro maggiorato Cylinder Works
(standard bore/high-compression)

Come tutti sanno, più CC equivalgono ad una maggiore potenza, proprio quella che viene fornita dai cilindri con diametro maggiorato Cylinder Works. Come per i nostri cilindri di ricambio OEM, i cilindri con diametro maggiorato sembrano di serie, ma non lo sono.

Oltre ad avere l'aspetto di componenti standard, i cilindri con diametro maggiorato Cylinder Works vantano una levigatura di precisione, un rivestimento in nichel carburo di silicio e un prezzo imbattibile.

Acquistati singolarmente, i cilindri con diametro maggiorato Cylinder Works offrono agli appassionati di elaborazioni la possibilità di scegliere il pistone e le guarnizioni più adatti.

Cylinder Works Big Bore Kit

With the exception of a mechanic, the Cylinder Works big bore kits provide everything you need to transform a bike or ATV from modest to monster in one box.

In addition to the stock appearing, nickel silicon carbide plated, precison honed, big bore cylinder, each kit contains:

- *All needed gaskets and seals to complete the installation*
- *A Vertex big bore piston, complete with piston rings, wrist pin and circlips.*

Kit per cilindri maggiorati Cylinder Works

I kit per cilindri maggiorati Cylinder Works forniscono tutto il necessario, eccetto il meccanico, per trasformare qualsiasi moto, Quad o ATV dalle prestazioni standard in un vero e proprio mostro di potenza.

Oltre al cilindro di diametro maggiorato dall'aspetto di serie, rivestito in nichel carburo di silicio e levigato di precisione, ciascun kit contiene:

- Tutte le guarnizioni e i giunti necessari per completare l'installazione
- Un pistone Vertex di diametro maggiorato, completo di segmenti, spinotto e anellini.

Why we use nickel silicon carbide plating

Nickel silicon carbide plating is used on the cylinder bore of every cylinder, standard and big bore, in the Cylinder Works line up.

The reasons for using nickel silicon carbide, as opposed to cast iron or chrome plating, are simple. Nickel silicon carbide allows for tighter tolerances between the piston and cylinder in larger bores, provides a low friction surface, is extremely durable and allows for greater heat dissipation to the water jacket.

All and all, the end result is a cylinder that not only yields higher performance, but will provide enthusiasts with a durable and reliable upgrade to their bike or ATV.

Perché utilizziamo un rivestimento in nichel carburo di silicio

Il nichel carburo di silicio viene utilizzato nell'intera gamma Cylinder Works per rivestire il diametro del cilindro di ogni cilindro, sia standard sia maggiorato.

Le ragioni per cui utilizziamo un rivestimento in nichel carburo di silicio, anziché ghisa o cromo, sono semplici. Il nichel carburo di silicio consente tolleranze più ristrette tra il pistone e il cilindro in diametri maggiorati, offre una superficie di attrito bassa, è estremamente resistente e consente una maggiore dissipazione del calore nello scambio di calore.

Il risultato che si ottiene è un cilindro che oltre a fornire prestazioni superiori garantisce agli appassionati di elaborazioni garanzie di durata e affidabilità insuperabili per la loro moto, Quad o ATV.

Pivot Works™

BEARING & SEAL KITS

Pivot Works is the fast, easy and complete solution when it comes to rebuilding a dirt bike or ATV chassis or suspension. Each Pivot Works kit contains all the necessary components (bearings, seals, pins, spacers, collars, thrust washers and thrust bearings) needed to finish the job without ordering a laundry list of parts. Better yet, all Pivot Works kits meet or exceed the quality of the OEM parts they replace and at a fraction of the cost. And, for those looking for a little assistance in getting their kit installed, Pivot Works posts assembly drawings and installation videos online.

Pivot Works è una soluzione rapida, facile e completa per ricostruire un telaio o le sospensioni di una moto da cross, di Quad o di un ATV. Ogni kit Pivot Works contiene tutti i pezzi necessari (cuscinetti, guarnizioni, spinotti, distanziali, collarini, rondelle di spinta e cuscinetti reggispinta) per completare il lavoro senza ordinare una lista infinita di componenti. Tutti i kit Pivot Works vantano inoltre una qualità uguale o superiore ai componenti OEM che sostituiscono, ad un costo incredibilmente più conveniente. E, per chi necessita di un po' di assistenza nell'installazione del proprio kit, Pivot Works pubblica online disegni di montaggio e video con tutte le istruzioni necessarie.

New From Pivot Works
Novità Pivot Works in arrivo

1 Watertight Wheel Collars

To extend the life of the wheel bearing, these collars are specially designed to prevent water from entering between the collar and axle.

Collarini ruota a tenuta stagna

Questi collarini sono progettati specificatamente per impedire all'acqua di penetrare tra il collarino e l'assale, migliorando la durata di vita del cuscinetto della ruota.

3 Shock Rebuild Kits

Complete kit to rebuild the internal components of the rear shock.

Kit per ricostruire l'ammortizzatore

Kit completo per ricostruire i componenti interni dell'ammortizzatore posteriore.

2 Shock Preload Thrust Bearings

To help prevent rear shock spring binding during compression and preload setting, Pivot Works now offers a new line of thrust bearings to smooth the ride.

Cuscinetti reggispinta per precarico degli ammortizzatori

Per contribuire a prevenire il grippaggio della molla dell'ammortizzatore posteriore durante la regolazione della compressione e del precarico, Pivot Works offrirà presto una nuova gamma di cuscinetti reggispinta per garantire una corsa uniforme.

4 ATV Front Hub Conversion Kits

Replaces ball bearings with tapered bearings for an upgrade in front wheel bearing durability and performance.

Kit Conversione Cuscinetti Sterzo Per Atv

Sostituisce i cuscinetti a sfera con gabbie a rulli per una maggiore affidabilità e durata.

PRICES

All the prices can be subject to alteration up to the final confirmation of the orders which we received. Unless otherwise agreement, the prices are understood to be in the currency shown in this price-list. The prices of the current price list are VAT excluded.

SHIPMENTS

Goods are always delivered ex-works our factory and they are carried at consignee's risk and on his behalf, even if they are delivered free. The order that we receive from the customers will be carried out with the goods available from stock; no back orders will be kept, if not agreed before.

PACKING

We charge the package to the customer at cost price.

GUARANTEE

All the claims have to be done within five days from the receipt of the goods. Our responsability is limited to material or working defects of the items we have sold. We are not responsible for damages when the pistons or the other components are altered, evading the original state. We are also not responsible for other possible damages to the other mechanical parts, to the people or to the other things, caused by the braking of the piston.

PAYMENTS

All the payments are to be understand by cash and must be effected by our Company in Cadelbosco Sopra. Other types of payments can be agreed, but in this case all the concerning expenses are to be understand at charge of the customer. We cannot accept payments effected through third parties, representative or agents.

OBJECTION

For every objection is competent the Court of Reggio Emilia.

PREZZI

Tutti i prezzi esposti nel presente listino si intendono IVA esclusa e possono essere soggetti a modifica sino alla definitiva conferma delle ordinazioni ricevute. Salvo diverso accordo, i prezzi si intendono nella valuta del presente listino.

SPEDIZIONI

La merce è sempre venduta franco ns. fabbrica ed in qualunque caso viaggia per conto e rischio del committente, anche se venduta franco destino. Gli ordinativi emessi dalla clientela si ritengono chiusi con la spedizione del materiale disponibile a stock, salvo diverso accordo tra le parti.

IMBALLO

L'imballo viene fatturato al committente al prezzo di costo.

GARANZIA

Qualsiasi reclamo deve essere fatto entro cinque giorni dal ricevimento delle merci. La nostra responsabilità è limitata ai difetti di materiali o di lavorazioni delle parti da noi vendute. Non siamo responsabili di danni a qualsiasi titolo quando il pistone, od organi ad esso collegati, vengono manomessi eludendo le condizioni originali. Non siamo responsabili per eventuali danni ad altre parti meccaniche, a persone o cose causate dalla rottura del pistone.

PAGAMENTI

Tutti i pagamenti si intendono per contanti e devono essere effettuati presso la nostra Sede in Cadelbosco Sopra. Per eventuali pagamenti pattuiti in modo diverso, tutte le spese inerenti si intendono a carico del cliente. Non sono ritenuti validi pagamenti effettuati a mezzo di terzi, Agenti e Rappresentanti.

CONTESTAZIONI

Per qualsiasi controversia è competente il Foro di Reggio Emilia.
